

### 1M Clip Rail with Taped Back

Universal rail for mounting underfloor and wall heating systems for use on a large surfaces. Designed for pipes with diameters of 16-18 or 25mm to simplify and shorten the installation time. The rail is available in 1000 mm lengths, consisting of two 500mm sections. Elements can be easily combined with each other.

A sticky-back tape is also used to allow installers to simply stick the rail to a surface in order to fix it's position.
